Dear Rudi,

On behalf of San Miguel Packaging Products, I would like to congratulate you and the entire Roeslein family on your upcoming 10th anniversary! I have read your latest brochure and am truly impressed on the growth and accomplishments of your company over the last decade.

On this occasion, we would like to reiterate our appreciation for your efficient service during the installation phase of our two-piece aluminum can plant – San Miguel Yamamura Ball Corporation – in 1995. Your expertise has ensured the smooth and on time start-up operations of our plant. Moreover, we would like to thank your company for providing us with intensive training on the development of the Data Highway Software. This has helped us to continuously monitor and improve our production performance.

Again, congratulations and we wish you another decade of continued success! It's also nice to see your charming picture and that of Dave May in the brochure! Warm personal regards to all Roeslein associates.

Sincerely,
